## **DETAILED ACTION**

## Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 1 – 29 are rejected under 35 U.S.C. 103(a) as being unpatentable over U.S. Patent Application No. 2004/0235416 (Chan et al.).

With respect to claims 1,5-7, 16, 20, 24 note Paragraph 0015. Note that there is no specific recitation of a telephone call, however note the use of the Internet. Since the Internet connection is usually done by way of dial-up, the claimed limitation is satisfied by inherency. If this is disagreed, such a limitation would have been obvious to one of ordinary skill in the art to make a telephone call to receive information.

With respect to claims 2, 17 and 25 note paragraph 0023.

With respect to claims 3 - 4, 18 - 19 and 26 - 27 note paragraph 0024

With respect to claims 8 - 10, 14 - 15, 21 - 23 note that the use of ANI or CLID to determine geographic location is so old in the art that no art is required.

With respect to claims 11 and 28 note paragraph 0034.

With respect to claims 12 and 29, DTMF is notoriously old in the art and it would have been obvious to one of ordinary skill in the art to have used DTMF in the place of FSK signals as such would only entail the substitution of one known signaling means for another.
